

For over a decade, water purveyors and backflow testers have relied on the peak performance of Acugauge backflow testing equipment. The innovative design of the Model 521G has made it the backflow test gauge of choice among industry professionals.

- Performs same tests as the more expensive and complicated 5-valve test kits, but with less moving parts to fail!
- Built on a platform and configuration comparable to Watts TK-9A
- Tested and proven in all fifty states, Canada, Australia, and the UK
- Easy to operate - uses same test procedures as other 3-valve kits, including, Watts TK-9A

Compliments of PM Magazine.

Acugauge Model 521G Backflow Preventer Test Kit Plus High Pressure Gauge

Product Description

3-valve backflow preventer test kit, equipped with an extra high pressure gauge for conveniently reading inlet pressure, now required by most water purveyors. Optimized for testing the following potable, irrigation, and fire line backflow preventer assemblies:

- Reduced Pressure Zone (RP)
- Double Check Valve (DC)
- Pressure Vacuum Breaker (PVB)
- Atmospheric Vacuum Breaker (AVB)
- Spill-resistant Pressure Vacuum Breaker (SPVB)
- Reduced Pressure Detector Assembly (RPDA)
- Double Check Detector Assembly (DCDA)

This product is not manufactured or distributed by Watts Water Technologies, manufacturer of TK-9A.

Product Support

- Live US-based phone support
- Same DP gauge fits both 521G and TK-9A, with no modifications
- Annual calibration service

Product Features & Benefits

- Simple 3-valve configuration built on a platform comparable to Watts TK-9A
- Large 4.5" diameter, easy-to-read Differential Pressure Gauge optimized at the critical 5-2-1 PSID pressure points for faster test results; scale: 0-15 PSID
- Large 2" diameter, easy-to-read High Pressure Gauge for conveniently reading inlet pressure, now required by most water purveyors; scale: 0-160 PSI
- (1) Precision, ergonomic needle valve
- (2) Instrument-grade shut-off valves
- (3) Flexible high-performance test hoses with female-threaded swivel couplings for easy finger tightening-no tools required
- Set of standard test cock adapters for easily attaching test hoses to assembly

- Ships fully assembled in padded Aluminum Carrying Case - start testing right out of the case
- Rated to perform at pressures up to: 175PSI
- Rated to perform at temperatures up to: 210^o F
- NIST Calibration Certificate

Product Enhancements

- Peace-of-mind 30-day Money Back Guarantee
- Peace-of-mind 5-year Parts and Labor Warranty
- Free Expedited Shipping
- In stock - ships next day
- Pricing levels tailored to training instructors
